

The Standard Business Package

The Standard Business Package is a great way for promoting your business in a full blown-out website.

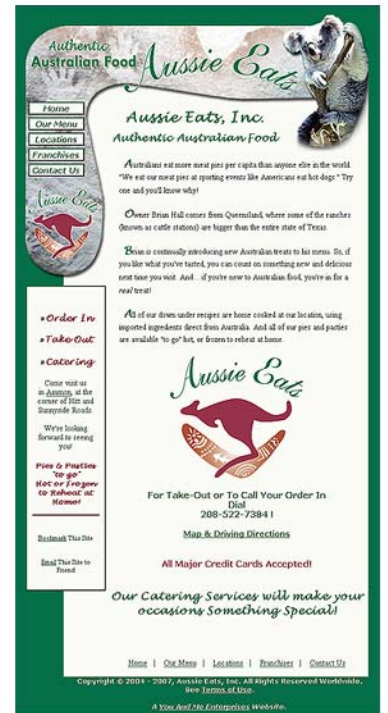

While it is next to impossible to tell your printed advertisement viewer everything about your business in a newspaper advertisement, it's very feasible and affordable to do so with this website package.

In short, because it has more features than the E-Biz Card or the E-Brochure, you can allow your viewer to know a great deal about your business prior to them doing business with you!
